It's fun for a while, but then there's not one but two time-running missions that you can't finish because checkpoints don't register. I thought maybe I did it in the wrong order but realized I couldn't. Plus, diamonds in the game are in completely inaccessible places! Fix these things and maybe it would be better. More less There are levels that have broken charcoal points, but next to that game is good more less Pretty graphics, good control and better gameplay.. But need a lot of improvement.. 1. For most of the hour trial, when you cross a checkpoint it is not intended, and the next check point is not to get activated, the bug should be looked at.. 2. Much smaller modes available to play, almost completed all time trial, Parkour and all.. Need more levela in the game.. more less The snowy mountain parkour is impossible to do because the building is in the way of the ramp, you need to fix more less A lot of fun, but a few mistakes (or are they conscious?) making things a little disappointing For example, some of the time runs are impossible to implement - eg. Can this be fixed? And some of the parkour games are impossible with a slower car. more less Nice game good graphics but need to improve so much there is a lot of a bug is in the game going trail it does not count checkpoint fix bug and the vehicle is too expensive but there is no way to earn that much money add more task and add a little map to find where you are.... more less Like others before, I really enjoyed this game.... initially. Not only that, but they also offer you many other rides, events and racing tournaments where you can participate. You can make money by doing stunts, and complete missions, you will be able to upgrade your car, customize it, and even buy new ones from the garage. You can adjust the graphics and resolution settings from the menu to run the game on weak devices. Every car in the game will have to reconcile statistics and will require you to upgrade them to increase their stats. The graphics and realistic controls and physics are what make this game stand out from the rest. You can use it to buy the most powerful SUVs, take them to the races and beat the other rivals! Table of Contents [ShowHide]Do you remember the Ultimate Motorcycle Simulator game I introduced before? The new experience in the racing genre that the game leaves will be hard to forget. The good news that the car version of the game has been released by Sir Studios. Forget the hard races against other opponents on the asphalt because Ultimate Offroad Simulator will take you to the Offroad world with a much more new and interesting approach! GameplayJust like Ultimate Motorcycle Simulator, the gameplay of Ultimate Offroad Simulator is quite simple to approach. Players sit on their cars, drive to places in the city to choose game mode. Time Trial mode where you must race with time to win. More specifically, search and collect checkpoint points for a limited time. If you win, you will receive a bonus and the system will be taken to the city center to continue to choose another game. Note that the challenge level will be raised to a level each time you conquer successfully. In addition, the game has also parkour mode. Just by hearing the name, you can already imagine the gameplay and the challenges to be overcome, right? Yes, the opportunity to show your driving ability is here. You have to run on containers, move through wooden planks to go higher. Sometimes you need to speed up to let the car fly through a hole and land across the road. So the challenge is pushed higher and higher every time you successfully conquer a terrain. The difficulty is that, but it also provides some attractive bonuses, stimulating the ability to conquer any racer. Sometimes, if you find the challenges too difficult, drive around town to practice and improve your driving skills. Precious diamonds also appear randomly, you can collect them for use for special activities! Upgrade your SUVs At the start of the game, the system gives you a standard vehicle. But you see as the difficulty gets worse and you realize this set of engines is too weak to climb this slope. Or this nitro tank is too small, not to

satisfy a speed enthusiast rider. Go to the upgrade section. Here you can replace or upgrade any part of the car, from the engine, turbo, wheels, Nitro, Suspension or gearbox. Each brings speed, control and adhesion pointing to the vehicle. As races, you know, the higher the performance indicators for a car, the easier it is to control and achieve the best performance on the track. Upgrade and overcome all challenges in this game. The graphicsgraphic in Ultimate Offroad Simulator is beautifully designed, the details on the map are polished, while the effects of light, day and night or dirt also show very real. As you drive around the game's big map, the weather is constantly changing, it gets darker, and sometimes you have a chance to watch the sunset over the ocean.
